

Requirements

- PowerShell v3.0 (naturally)
- Admin credentials (domain environment preferred)
- A system you can use to experiment
- A second computer also running PowerShell v3.0 is recommended
- Windows 8 with Hyper-V is an ideal learning platform

TRAINSIGNAL

Lab Setup

- Windows 8 Enterprise desktop
- Windows Server 2012 Domain controller
- Windows Server 2008 R2 Domain Controller with PowerShell v3
- Windows Server 2008 R2 Domain Controller with PowerShell v2
- Assorted other servers some running v2 and some v3

TRAINSIGNAL

Scenario

- You are a network administrator in the Chicago office of Globomatics
- Windows Server 2012 and Windows 8 will be deployed over the next year
- You want to get up to speed on changes in PowerShell to maintain and improve your management skills
